

**RESIDENTIAL ALTERNATIVE
CALCULATION METHOD (ACM)
APPROVAL MANUAL**

for the

**2005 BUILDING ENERGY EFFICIENCY
STANDARDS FOR RESIDENTIAL AND
NONRESIDENTIAL BUILDINGS**

CALIFORNIA
ENERGY
COMMISSION

STANDARDS/REGULATIONS

Effective October 1, 2005

OCTOBER 2004
P400-03-003F

Arnold Schwarzenegger, Governor

CALIFORNIA ENERGY COMMISSION

William J. Keese,
Chairman

Commissioners:
Arthur H. Rosenfeld
James D. Boyd
John L. Geesman
Jackalyne Pfannenstiel

Robert L. Therkelsen,
Executive Director

G. William Pennington,
Manager
**BUILDINGS AND
APPLIANCES OFFICE**

Valerie T. Hall,
Deputy Director
**ENERGY EFFICIENCY AND
DEMAND ANALYSIS
DIVISION**

NOTICE

This version of the *2005 Residential Alternative Calculation Method (ACM)Approval Manual for the Building Energy Efficiency Standards* is an “unmarked” version; that is, it contains no underlined or struck-out text showing changes from the 2001 Standards (the changes are incorporated, however). A marked version is available on the Energy Commission’s website or in hard copy from the Commission’s Buildings and Appliances Office. Visit www.energy.ca.gov/title24, call the Title 24 Energy Efficiency hotline at 800/772-3300 (toll-free from within California) or 916/654-5106, or send email to title24@energy.state.ca.us.

Table of Contents

1.	Overview	1-1
1.1	Minimum Modeling Capabilities	1-1
1.2	Optional Modeling Capabilities	1-1
1.3	Application Checklist	1-2
1.4	Types of Approval.....	1-2
1.5	Challenges	1-3
1.6	Decertification of ACMs	1-4
1.7	Alternative ACM Tests.....	1-5
1.8	Approval of New Exceptional Methods.....	1-5
2.	Standard Reports	2-1
2.1	General	2-1
2.2	Certificate of Compliance –Residential Computer Method (CF-1R)	2-2
3.	Defining the Proposed and Standard Designs	3-1
3.1	Building Physical Configuration.....	3-1
3.2	Opaque Envelope Elements	3-2
3.3	Fenestration and Doors	3-5
3.4	Thermal Mass.....	3-8
3.5	Infiltration/Ventilation.....	3-8
3.6	Heating and Cooling System.....	3-10
3.7	Water Heating.....	3-14
3.8	Additions and Alterations	3-17
4.	Required Modeling Assumptions and Algorithms	4-1
4.1	General Modeling Assumptions.....	4-1
4.2	Heat Gains and Losses Through Opaque Surfaces	4-6
4.3	Heat Gains and Losses Through Fenestration	4-10
4.4	Thermal Mass.....	4-12
4.5	Infiltration and Natural Ventilation.....	4-12
4.6	Heating Systems.....	4-18
4.7	Air Conditioning Systems.....	4-19
4.8	Duct Efficiency.....	4-24
4.9	Hourly Attic Duct Efficiency Multipliers	4-32
4.10	Water Heating Calculations	4-34
5.	Minimum Capabilities Tests	5-1
5.1	Overview.....	5-1
5.2	Space Conditioning Tests.....	5-5
5.3	Water Heating Tests (WH)	5-13
6.	Optional Capabilities Tests	6-1
6.1	Overview.....	6-1
6.2	Optional Space Conditioning Capabilities	6-1
6.3	Solar Thermal Water Heating.....	6-13
7.	Home Energy Rating Systems (HERS) Required Field Verification And Diagnostic Testing	7-1
7.1.	California Home Energy Rating Systems	7-1
7.2.	Measures Required Field Verification and Diagnostic Testing	7-1
7.3.	Summary of Documentation and Communication.....	7-3
7.4	Installer Requirements for Installation Certification (CF-6R)	7-3
7.5	Verification and Sampling Procedures	7-4
7.6	Third Party Quality Control Programs	7-6
7.7	Sampling for Additions or Alterations	7-7
7.8	Summary of Responsibilities	7-8
7.9	Definitions of Terms Used In This Chapter	7-10

8.	Compliance Supplement	8-1
8.1	CEC Approval.....	8-1
8.2	Program Capabilities	8-1
8.3	Standard Input/Output Report	8-1
8.4	Fixed and Restricted Inputs	8-1
8.5	Preparing Basic Input	8-2
8.6	Optional Capabilities	8-2
8.7	Special Features and Modeling Assumptions	8-2
8.8	Field Verification	8-2
8.9	Checklist for Compliance Submittal	8-2
8.10	Sample Compliance Documentation	8-2
8.11	Compliance Statement	8-2
8.12	Related Publications	8-3
9.	Vendor Requirements Availability to CEC	9-1
9.1	Building Department Support	9-1
9.2	User Support	9-1
9.3	ACM Vendor Demonstration	9-1

List of Tables

Table R2-1 – HVAC Heating Equipment Descriptors.....	2-17
Table R2-2 – HVAC Cooling Equipment Descriptors	2-18
Table R2-3 – HVAC Distribution Type and Location Descriptors	2-19
Table R2-4 – Hydronic Terminal Descriptors	2-22
Table R2-5 – Water Heating Distribution System (Within Dwelling Units) Descriptors	2-24
Table R2-6 – Control Systems for Multi-Unit Distribution Systems	2-24
Table R2-7 – Water Heater Types	2-25
Table R2-8 – Pipe Conditions for Systems Serving Multiple Dwelling Units	2-25
Table R2-9 – Water Heater Input Summary	2-27
Table R3-1 – Ceiling/Roof U-factors for Standard Design.....	3-3
Table R3-2 – Wall U-factors for the Standard Design	3-4
Table R3-3 – Floor U-factors for the Standard Design.....	3-4
Table R3-4 – Slab Edge F-factors for the Standard Design	3-5
Table R3-5 – Allowed Interior Shading Devices and Recommended Descriptors	3-7
Table R3-6 – Standard Design Shading Conditions	3-7
Table R3-7 – Allowed Exterior Shading Devices and Recommended Descriptors	3-8
Table R3-8 – Water Heater Distribution System Choices (Within the Dwelling Unit)	3-15
Table R3-9 – Multiple Dwelling Unit Recirculating System Control Choices	3-15
Table R3-10 – Specification of Standard Design Water Heater	3-16
Table R3-11 – Default Assumptions for Existing Buildings	3-22
Table R4-1 – Hourly Thermostat Set Points	4-2
Table R4-2 – Hourly Internal Gain Schedules	4-5
Table R4-3 – Seasonal Internal Gain Multipliers	4-5
Table R4-4 – Modeling Rules for insulation installation Quality	4-8
Table R4-5 – Monthly and Annual Average Ground Temperatures	4-9
Table R4-6 – Earth Temperatures for Modeling Basement Walls and Floors	4-9
Table R4-7 – Polynomial Coefficients for Angular Dependence	4-11
Table R4-8 – Infiltration Coefficients	4-15
Table R4-9 – Airflow Criteria	4-24
Table R4-10 – Duct Efficiency Input Parameters and Defaults.....	4-24
Table R4-11 – Location of Default Supply Duct Area	4-25
Table R4-12 – Buried Duct Effective R-values	4-28
Table R4-13 – Duct Leakage Factors	4-29
Table R4-14 – Assumptions for Duct Ambient Temperature (°F)	4-31

Table R4-15 – Thermal Regain Factors	4-32
Table R4-16 – Coefficients.....	4-34
Table R4-17 – Seasonal Sol-Air Temperature Difference, °F	4-34
Table R5-1 – Summary of the Space Conditioning Tests	5-7
Table R5-2 – Standard Design Tests.....	5-11
Table R5-3 – Neutral Variable Design Tests – Space Conditioning.....	5-11
Table R5-4 – Summary of the Addition-Alone Tests.....	5-12
Table R5-5 – Summary Existing + Addition + Alteration Tests	5-13
Table R5-6 – Base Case Water Heating Systems.....	5-14
Table R5-7 – Accuracy Tests – Water Heating	5-15
Table R5-8 – Standard Design Equivalent Tests – Water Heating	5-16
Table R5-9 – Neutral Variable Tests – Water Heating.....	5-16
Table R6-1 – Summary of the Optional Space Conditioning Tests	6-2
Table R6-2 – Annual Pipe Loss Rates (kBtu/y-ft).....	6-6
Table R6-3 – Combined Hydronic System Specifications	6-7
Table R6-4 – OG-300 Solar Systems Tests.....	6-15
Table R6-5 – Prototype Solar System.....	6-15
Table R6-6 – OG 100 Solar System Tests	6-16
Table R7-1 – Summary of Measures Requiring Field Verification and Diagnostic Testing.....	7-2

List of Figures

Figure R2-1 – Overhang Dimensions	2-10
Figure R2-2 – Side Fin Dimensions	2-11
Figure R3-1 – Surface Definitions	3-3
Figure R5-1 – Testing Concept – Discrete Modifications Produce Positive Compliance Margin	5-2
Figure R5-2 – Testing Concept – Discrete Modifications Produce Negative Compliance Margin	5-2
Figure R5-3 – Testing Concept – Discrete Modifications Produce Positive But Small Compliance Margin	5-3
Figure R5-4 – Testing Concept – Discrete Modifications Produce Negative But Small Compliance Margin	5-3
Figure R5-5 – Custom Budget Tests.....	5-4
Figure R5-6 – Labeling of Computer Simulations	5-5
Figure R5-7 – Prototype Buildings A and B	5-6
Figure R5-8 – Overhang Characteristics	5-9
Figure R5-9 – Side Fins for Optional Capabilities Test	5-10
Figure R5-10 – Prototypes E and F	5-12
Figure R6-1 – Section at Crawlspace Perimeter	6-8
Figure R6-2 – Zoning the Prototype Building	6-10
Figure R6-3 – Sunspace Prototype	6-11

Appendices Table of Contents

Appendix RA – Certification of Alternative Calculation Method	RA-1
RA.1 Space Conditioning Tests (SC)	RA-2
RA.2 Standard Design Tests (SD)	RA-11
RA.3 Additions and Alterations Tests.....	RA-14
RA.4 Water Heating Tests	RA-16
RA.5 Water Heating Neutral Variable Tests (WD).....	RA-21
RA.6 Optional Capabilities Tests (OC).....	RA-22
RA.7 Solar Systems Tests (SS)	RA-27
Appendix RB – Interior Mass Capacity.....	RB-1
RB.1 Scope and Purpose.....	RB-1

RB.2 Calculating Interior Mass Capacity (IMC).....	RB-1
RB.3 IMC Threshold for a High Mass Building.....	RB-1
RB.4 Table Notes.....	RB-5
Appendix RC – Procedures for Field Verification and Diagnostic Testing of Air Distribution Systems ..	RC-1
RC.1 Purpose and Scope	RC-1
RC.2 Instrumentation Specifications	RC-1
RC.3 Apparatus	RC-2
RC.4 Procedures	RC-2
Appendix RD – Procedures for Determining Refrigerant Charge for Split System Space Cooling Systems without Thermostatic Expansion Valves	RD-1
RD.1 Purpose and Scope	RD-1
RD.2 Standard Charge Measurement Procedure	RD-1
RD.3 Alternate Charge Measurement Procedure.....	RD-5
Appendix RE – Field Verification and Diagnostic Testing of Forced Air System Fan Flow and Air Handler Fan Watt Draw	RE-1
RE.1 Purpose and Scope	RE-1
RE.2 Instrumentation Specifications	RE-1
RE.3 Apparatus	RE-2
RE.4 Procedure	RE-2
Appendix RF – HVAC Sizing	RF-1
RF.1 Purpose and Scope.....	RF-1
RF.2 Procedure for Calculating Design Cooling Capacity.....	RF-1
RF.3 Procedure for Calculating Maximum Cooling Capacity for ACM Credit	RF-3
RF.4 Procedure for Determining Electrical Input Exception for Maximum Cooling Capacity for ACM Credit	RF-3
Appendix RG – Water Heating Calculation Method	RG-1
RG.1 Purpose and Scope	RG-1
RG.2 Water Heating Systems	RG-2
RG.3 Hourly Adjusted Recovery Load	RG-2
RG.4 Energy Use of Individual Water Heaters	RG-14
RG.5 Electricity Use for Circulation Pumping	RG-19
Appendix RH – High Quality Insulation Installation Procedures.....	RH-1
RH.1. Purpose and Scope	RH-1
RH.2 Terminology	RH-1
RH.3 Raised Floors and Floors Over Garages	RH-2
RH.4. Wall Insulation.....	RH-2
RH.5 Ceiling and Roof Insulation.....	RH-4
RH.6 Materials	RH-6
RH.7 Equipment	RH-6
RH.8 R-Value and U-Value Specifications	RH-6
RH.9. Certificates	RH-6
RH.10 Certificate Availability	RH-6
CF-6R & CF-4R Insulation Installation Quality Certificate	RH-7
Appendix RI – Procedures for Verifying the Presence of a Thermostatic Expansion Valve or High Energy Efficiency Ratio Equipment	RI-1
RI.1 Purpose and Scope.....	RI-1
RI.2 TXV Verification Procedure.....	RI-1
RI.3 Time Delay Relay Verification Procedure	RI-1
RI.4 Matched Equipment Procedure	RI-2
